Cerebral Palsy Transport, Inc. is a division of

cpunlimited.org

@constructivepartnerships

Constructive Partnerships Unlimited promotes opportunities for people with
intellectual and developmental disabilities to achieve fulfilling lives.

About CP Transport

Take advantage of our fleet, network, and know-how when making the choice in selecting a transport provider for your organization. CP Transport provides:

For more than fifty years, Cerebral Palsy Transport, Inc. ("CP Transport") has been a reliable, safe, and dedicated provider of quality movement services for persons with disabilities in New York.

Founded as one of the first entities offering dependable transportation for our most vulnerable, CP Transport is today a leading provider for the disability field.

Through continuous training, maintenance, and upgrades, CP Transport sustains the highest levels of secure and steady support.

For agencies, schools, programs, and others interested in contracting services, CP Transport rates are both competitive and fair, reflecting our sustaining commitment to careful and caring transport for people with I/DD.

Contracting Services

- CP Transport will oversee all bidding processes, assisting, and guiding programs in the process of selecting a bus vendor
- Each vendor is vetted to ensure they meet our standards and procedures

Oversight and Compliance of Vendors

- CP Transport manual provided as a guide to all vendors, family, and staff of individuals
- Training to all staff regarding communications, computer literacy, technology, and more
- Continuous monitoring of vendors

Safe Operation

- All drivers and aides are certified and retrained each year to ensure they continuously maintain top standards
- CP Transport employs an on-the-road safety team who perform scheduled and random checks on both vehicles and staff performance
- Contracted employees are reviewed to meet the standards of our vigorous internal license review program

Efficiency and Environmental Considerations

- Routes are scrutinized regularly to map potential efficiencies, and to take construction or other scheduled delays into account
- Bus related events are subject to review by our team in conjunction with vendors and programs

Innovation and Technology

- State of the art routing software ensures timely transport and positive streamlining
- All vehicles are equipped with GPS devices, bus safety cameras, and dashcams to ensure accuracy of vehicle locations and monitor drivers, passengers, and road action
