Services offered in NYC, Hudson Valley, and Nassau County

Hudson Valley Supports

Comprehensive, caring services
for people with disabilities

Day Habilitation Program

400 Westage Business Center Drive | Fishkill, NY

CP Unlimited's newest Day Hab program is a center of innovation and personal progress in the Hudson Valley.

Opened in a new setting in 2025, the 10,000 square foot, custom-designed space includes classrooms for learning and engagement, integrated assistive technology, and areas for movement and mobility classes and other educational efforts.

Advocacy & Activism

A central component of CP Unlimited's work is helping the people we support add their voice to important issues facing our community. Each year, we bring our cohort to Albany, New York and other venues to meet with political leaders and communicate their needs and concerns, while advocating for increased support for the disability field.

CPU self-advocates were also the inspiration for the "Traveling with Dignity" Act, seeking to provide height-adjustable adult changing tables in public venues across the state. At time of publication, the bills (S.4042/A.6319) are making their way through the state legislature with hope for eventual passage.

Residential Services

Throughout Hudson Valley

Residential settings are available in various Hudson Valley counties providing twenty-four hour support for people with intellectual and developmental disabilities.

For our people who need all day care as well as others who require less intensive support, CP Unlimited provides accessible, enriching, safe, and comfortable homes that take the needs of every individual into account.

In recent years, CP Unlimited has pioneered new homes in Yonkers, Poughkeepsie, Wappingers, and other communities to modernize and expand our residential offerings for persons with disabilities. We look forward to continuing this work with the goal of integrating more technology and tools to create additional opportunities for a fulfilling life.
